Who reports to whom?	• **General Manager** (Top level) – **Front Desk Receptionists (2)** — handle check-ins and member check-outs. – **Personal Trainers (3)** — handle member training and fitness assessments. – **Retail Sales Associates (2)** — manage the front-desk supplement shop. – **Equipment Maintenance Technicians (2)** — maintain gym machines and inspect rental items. – **Finance/Admin Staff (2)** — handle billing, payroll, and paper record keeping.

Organizational chart:

Current situation and problems:

At FitHub, work is fragmented across **disconnected manual channels**. *Front Desk Receptionists* record new gym memberships on printed paper intake forms and **manually log payment receipts** into a local Excel sheet.

Equipment rentals are managed using **paper rental agreements** stored in **physical binder folders** and when a customer picks up or returns a treadmill or rower, the *Maintenance Technician* **writes down the item's condition and serial number** on a paper checklist.

Retail Sales Associates handle supplement sales through an **offline, standalone electronic cash register** (POS) that **does not link to customer accounts**.

When equipment breaks or requires routine maintenance, *trainers* notify the *Maintenance Technicians* via **WhatsApp group chats.** The *Finance Staff* compiles weekly cash register receipts and Excel sheets into a master accounting file at the end of each month. No single central system bridges membership records, retail inventory, or equipment rental tracking.
